# NFPA 1970 STANDARD SIZE CHART

NFPA 1970-2025 has introduced mandatory numerical sizing (64-82) in two widths, narrow (N) and wide (W).

## HOW TO MEASURE YOUR HAND

To determine the best size and fit, **measure your index finger** (refer to diagram A) from the palm crease to the fingertip in millimeters. This will give you the closest numerical size.

Now **measure across the top of your knuckles** (refer to diagram B).

In this example the glove size would be a 76W. Find the corresponding size/width based on diagram C to determine your glove size.

Diagram A

Diagram B

| NFPA SIZE   | 64N | 70N | 70W | 76N | 76W | 82N | 82W | 82XW |
|-------------|-----|-----|-----|-----|-----|-----|-----|------|
| LETTER SIZE | XXS | XS  | S   | M   | L   | XL  | 2XL | 3XL  |

# STRUCTURAL FIREFIGHTING GLOVES

## M7G KANGAROO LEATHER GAUNTLET

The M7G glove combines premium kangaroo leather construction with a 3D-curved, ergonomic design that mirrors natural hand movement for superior control.

Engineered for protection, the gloves feature a Porelle® moisture and bloodborne pathogen barrier, a Kovenex® liner for flame, cut, and puncture resistance, reflective trim for enhanced visibility, heat-resistant, water-repellent materials that won't melt, drip, or ignite in extreme conditions, and a 60+ TPP rating for advanced thermal protection.

The gauntlet cuff features a cinched wrist and leather pull-tab, keeping your gloves in place as you tackle any task.

## M7W KANGAROO LEATHER WRISTLET

The M7W glove combines premium kangaroo leather construction with a 3D-curved, ergonomic design that mirrors natural hand movement for superior control.

Engineered for protection, the gloves feature a Porelle® moisture and bloodborne pathogen barrier, a Kovenex® liner for flame, cut, and puncture resistance, reflective trim for enhanced visibility, heat-resistant, water-repellent materials that won't melt, drip, or ignite in extreme conditions, and a 60+ TPP rating for advanced thermal protection.

A snug wristlet cuff helps seal out debris, keeping contaminants from entering the glove during critical operations.
